ABOUT ME

I recently pursuing my B.Tech Degree from College of Engineering and Management, Kolaghat in Computer Science and Engineering. While there, I learned a lot of theory in subjects like Data Structure and Algorithm, Database management system, Software Engineering and more. I've worked hard in my education and now I'm ready to apply my knowledge into practice. While I don't have any real-life work experience, a lot of my courses involved working with real companies to solve real problems. Now, I'm looking to leverage everything I've learned in collage and get some hands-on work experience.
